TAPING

The KO 16 is a strapping device suitable for processing 16 mm plastic strap. Because the device has a combined operating lever, the KO 16 can tension, lock (with seal) and cut with only one lever.

The KO 16 is ideal for handling a small number of straps per day and can be used for light and medium applications. Ideally, the KO 16 is used in combination with a plastic strap dispenser for optimum ease of use and efficiency. The device is suitable for multiple types of plastic tape such as polypropylene, polyester and rayon strap.

Advantages

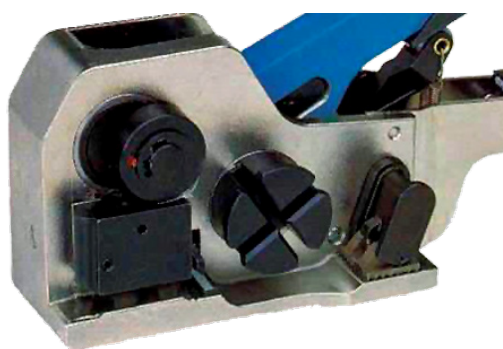

- For PP and PET strap 16 mm
- The heavier version of the KO 76
- Fast and easy to operate
- Combined operating lever
- For small number of straps per day
- For light and medium/heavy applications
- For use in environments with fire hazards

Options

- Plastic strap dispenser
- Plastic strap seals
